Circuit Board

Purchase the components and solder a board according to the circuit diagram.

Test Circuit Board

Display

Display

Print it with a 3D printer

Calibration Switch

Replace the original switch with the SPST.

Remove the original Effect on/off switch by wiggling it back and forth so that the contacts break off on the switch side.

If you need more solder space, do it from behind.

Classic / Chords

Anti Noise Filter

MAIN LED

Final Wiring

Final Wiring 2

Wrong wired? NP
You can change it in
Software!

Bend it

(Ken Tittel)

Final Wiring 3

0.9mm/0.04in

Software for RP2040 Zero

**1.)
Download the
Testsuite and
flash it with Thonny
IDE to RP2040**

All wiring is fine?

Got to ->

<https://www.nexosoft-engineering.de/neo/index.html>

**2.) Download Pro
Flashing Tool**

3.) Buy Software

4.) Flash to 2040 Zero

5.) ROCK
